

Bulletin Volume 206-230

By Ohio Agricultural Station

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1909 Excerpt: . are combined. The extracts of all the tissues are then made up to 1000 c. c. It is especially important that the brain extracts be kept and handled boiling-hot. If the sand filter clogs during the filtration, this process may be greatly facilitated by lightly scratching over the surface of the sand with a stirring rod, taking care not to touch the linen. It is not advisable to attempt to handle more than 10 grams of brain in one beaker, on account of the necessity of completing the filtration promptly while the solution is hot. DETERMINATION OF INORGANIC PHOSPHORUS Measure out 250 c. c. portions of the extract into 400 c. c. beakers. Evaporate to 50 c. c. by gentle boiling; filter while hot, and wash with boiling water. Cool, and add 10 c. c. magnesia mixture, stirring freely; allow to stand 15 minutes, and...
