

All about Steve Wozniak (Paperback)

By Paul Freiberger

Blue River Press, 2018. Paperback. Condition: New. Language: English . Brand New Book. Steve Wozniak grew up with an insatiable curiosity that his father, a programmer, helped fuel. After being accepted to the University of Colorado Boulder, Steve was quickly expelled for hacking into the college's computer system. He then got a job at Hewlett-Packard where he met Steve Jobs. Together, the two Steves created the Apple Computer company. Steve Wozniak's job at Apple was to program the computers to be programmable, compact, and fast, which was no easy feat when most computers at the time filled a room. Steve Jobs's role was to market and sell the new computers. Woz, as his friends called him, single-handedly designed and programmed the hardware, circuit boards, and operating system for the Apple I. Slowly, the tech world caught up to him and the personal computer was born.
